

WHAT IS CLAIMED IS:

1. A system for enabling a user to select among and access one of a plurality of internet websites, comprising:
a graphical user interface, which includes:
an array of web channels, each of which is adapted to be associated with at least one of a plurality of internet websites; and
means for associating each of the array of the web channels with at least one of the plurality of the internet websites.
2. The system of claim 1, wherein the graphical user interface further includes a web channel guide, in which the array of the web channels is presented.
3. The system of claim 1, further comprising a plurality of web channel buttons, each of which is adapted to be associated with one of the array of the web channels.
4. The system of claim 1, wherein each of the array of the web channels is adapted to be associated with a plurality of the internet websites.
5. The system of claim 1, further comprising means for enabling the user to customize the at least one of the plurality of internet websites associated with each of the array of the web channels.
6. The system of claim 1, further comprising means for enabling the user to navigate among the array of the web channels.
7. The system of claim 1, further comprising means for displaying the graphical user interface.
8. The system of claim 1, further comprising means for identifying the web channel being presented, upon presenting the web channel.

9. The system of claim 1, further comprising means for enabling the associating means to access an internet website selected by the user.

10. The system of claim 1, further comprising a client device, including an internet browser for enabling access to and retrieval of the plurality of the internet websites.

11. The system for enabling a user to select among and access one of a plurality of internet websites, comprising:

a graphical user interface, which includes:

an array of web channels, each of which is adapted to be associated with at least one of a plurality of internet websites; and

a web channel guide, in which the array of the web channels is presented; and

means for associating each of the array of the web channels with at least one of the plurality of the internet websites.

12. A system for enabling a user to select among and access one of a plurality of internet websites, comprising:

a graphical user interface, which includes:

an array of web channels, each of which is adapted to be associated with at least one of a plurality of internet websites; and

a plurality of web channel buttons, each of which is adapted to be associated with one of the array of the web channels; and

means for associating each of the array of the web channels with at least one of the plurality of the internet websites.

13. The system of claim 12, wherein each of the plurality of the web channel buttons includes a web channel number, and a web channel title representing the associated internet website.

14. The system of claim 13, wherein each of the plurality of the web channel buttons includes a uniform resource locator representing the associated internet website.

15. The system for enabling a user to select among and access one of a plurality of internet websites, comprising:

a graphical user interface, which includes:

an array of web channels, each of which is adapted to be associated with a
5 plurality of internet websites; and

means for associating each of the array of the web channels with the plurality of the internet websites.

16. The system of claim 15, further comprising means for enabling the user to navigate among the plurality of the internet websites associated with each of the plurality of the web channels, and to obtain access to each of the plurality of the associated internet websites.

17. The system of claim 15, further comprising means for enabling the displaying of the web channel guide, wherein the displaying enabling means are further adapted to enable the displaying of the plurality of the associated internet websites.

18. The system of claim 15, further comprising a client device, and means for enabling a plurality of the internet websites associated with the plurality of the web channels to be downloaded and stored in the client device.

19. The system of claim 15, wherein each of the plurality of the web channels comprises one of a plurality of the internet websites commonly accessed by the user.

20. The system of claim 15, wherein each of the plurality of the internet websites comprises one of the plurality of the internet websites selected for the user.

comprise a guide strip, adapted to be presented upon presenting the web channel.

39. The system of claim 38, wherein the guide strip is adapted to include a web
channel number, and a web channel title representing the associated web channel.

40. A system for enabling a user to select among and access one of a plurality
of internet websites, comprising:

a graphical user interface, which includes:

[illegible]

means for enabling the associating means to access the internet website selected by the user.

41. The system of claim 40, wherein the access enabling means comprise a digital cable system.

42. The system of claim 40, wherein the access enabling means comprise a telephone modem.

43. The system of claim 40, wherein the access enabling means comprise a digital broadcast satellite system.

44. The system of claim 40, wherein the access enabling means comprise a web server.

45. A system for enabling a user to select among and access one of a plurality of internet websites, comprising:

a graphical user/interface, which includes:

an array of web channels, each of which is adapted to be associated with at least
5 one of a plurality of internet websites;

means for associating each of the array of the web channels with at least one of the plurality of the internet websites;

a client/device; and

an internet browser, adapted to enable access to and retrieval of the plurality of
